Sectional / Segmented Screw Flight

Material : Carbon Steel, Low Alloy Steel, Wear Resistance Steel, Stainless Steel etc.

Features : A single pitch construction with consistent cross sectional thickness between inner & outer edges. Every screw flight section is formed accurately up to the customers' size. A wide range of size up to 2000 mm in diameter, 40 mm in thickness, 1500 mm in pitch are available. Ribbon, Tapered & variable pitch flights are available on application. Flights can also be hard faced or coated with wear protection materials. High precision and customized size can be made.

Specifications : Any screw flights with size coming in the range of the following table can be made.

PITCH (MM)	MINIMUM INNER DIAMETER (MM)	MAXIMUM OUTER DIAMETER (MM)	THICKNESS (MM)
60-150	30	480	CARBON STEEL ≤ 50 MM MANGANESE STEEL ≤ 50 MM STAINLESS STEEL ≤ 40 MM
150-200	50	520	
200-300	60	670	
300-450	90	950	
450-500	135	1150	
500-650	150	1350	
650-850	200	1400	
850-950	250	1450	
950-1200	300	1600	
1200-1250	400	1800	
1250-1300	450	2000
